

telesis[®]

Entwicklungs- und Management GmbH

Managing cooperation projects in regional development and research work is our key business on regional as well as on international level. We develop and support structural improvement projects. In close cooperation with companies, local authorities and professional organizations we develop sustainable concepts and support their implementation.

Beside managing regional development projects telesis has specialized on the development and support of online project management tools.

For this task we are looking for:

Webdeveloper/IT-Manager (f/m)

You are used to work independently? You are looking for new solutions?

Your tasks

- Development of new or maintenance of existing web solutions (OOP in PHP with Symfony, SQL)
- Support of website infrastructure
- Maintenance of existing IT infrastructure (system administration)

You have

- Completed education in IT / web development (computer science studies, technical college etc.) or you are career changer with several years of professional experience in a comparable field
- Experience in OOP with PHP and knowledge in HTML, CSS, JavaScript and SQL
- Motivation in the independent development of solutions

We offer

- Collaboration in exciting and innovative projects
- a varied job with a lot of freedom of action
- Collaboration in a familiar team with a flat hierarchy

For the planned job we budget an annual salary in the amount of EUR 40,000. The actual salary depends on your knowledge, skills and experience.

We look forward to receiving your job application!
